

# WaterGlow™ LED RGB Lighting

Customize Your Fountain with 9 Different Colors, 3 Sequencing Patterns and the Music of Your Choice

## CUTTING-EDGE TECHNOLOGY FOR UNMATCHED DURABILITY

Kasco is pleased to offer our WaterGlow™ LED RGB Lighting kits for our fountains and aerators. These light kits are the ultimate in custom, decorative lighting and will add a vibrant level of fun and drama to any backyard pond, lakefront, event venue or related setting. Using the included remote control, easily choose from 9 different colors, 3 different rhythmic sequencing patterns and 5 different levels of brightness. Kasco's RGB light kits can even be set to music by using the included 3mm Y connector and any music playing device with a standard AUX input. Using just 24Vdc and 5W per fixture, these high performing RGB LED lighting systems will deliver the brilliant, show-stopping color display you've been looking for.

- White, warm white, red, green, blue, orange, yellow, cyan and magenta
- Available as a 3 fixture (for 1/2HP - 1HP units) or 6 fixture (2HP - 3HP units) kit
- 1-piece composite housing ensures water-tight operation
- Lens is secured with cutting-edge weld technology for leak-free assembly
- Durable construction ensures low cost of ownership and many hours of enjoyment
- Each kit includes fixtures, power cord, remote control, 3mm Y AUX connector and separate control panel to be wired into fountain control panel
- No need to change lens to achieve new color
- Includes all necessary mounting hardware

## ULTIMATE CUSTOMIZATION

Kasco's RGB LED color changing lights offer a new level of customization. Choose from the 9 vibrant colors of white, warm white, red, green, blue, orange, yellow, cyan and magenta to add unmatched visual interest to your display. Each color can then be further customized to a different brightness level, and the With the 3 color sequencing options, you can choose how your RGB lights transitions from color to color:

**Flash:** Jump to the next color

**Bloom:** Quick transition to the next color

**Smooth:** Gradual change to the next color

## RHYTHMIC SEQUENCING - ADD YOUR MUSIC!

These lighting systems even provide the option to set the fountain or aerator display to your own music! Using the included 3mm Y connector and the standard AUX input on your music device. Watch as the color changes to the beat!

## UNMATCHED DURABILITY

Kasco's exciting RGB LED lights are designed and manufactured to be the most reliable on the market. Using a 1-piece composite housing and a lens that's been ultrasonically welded and guaranteed to stay in place, you can trust these systems to be leak-free and brilliantly bright for many hours to come. There's no need to change a lens or lens cap to see a different color, simply push the button on the remote control.
